

React

2. ReactJS-HOL

Created studentapp and added container file in src file

And in container folder , created 3 js files and named it as About.js, Home.js and Contact.js

And written the following code in each js file

```
studentapp > src > Components > JS Home.js > ...
1  import React, { Component } from 'react';
2
3  class Home extends Component {
4    render() {
5      return (
6        <div>
7          <h3>Welcome to the Home Page of Student Management Portal</h3>
8        </div>
9      );
10   }
11 }
12
13 export default Home;
14
```

```
studentapp > src > Components > JS About.js > ...
1  import React, { Component } from 'react';
2
3  class About extends Component {
4    render() {
5      return (
6        <div>
7          <h3>Welcome to the About Page of Student Management Portal</h3>
8        </div>
9      );
10   }
11 }
12
13 export default About;
14
```

```
studentapp > src > Components > JS Contact.js > ...
1  import React, { Component } from 'react';
2
3  class Contact extends Component {
4    render() {
5      return (
6        <div>
7          <h3>Welcome to the Contact Page of Student Management Portal</h3>
8        </div>
9      );
10   }
11 }
12
13 export default Contact;
14
```

Then updated App.js with the following code

```
studentapp > src > JS App.js > ...
 1  import React from 'react';
 2  import logo from './logo.svg';
 3  import './App.css';
 4  import Home from './Components/Home';
 5  import About from './Components/About';
 6  import Contact from './Components/Contact';
 7
 8  function App() {
 9    return (
10      <div className="container">
11        <Home/>
12        <About/>
13        <Contact/>
14      </div>
15    );
16  }
17
18  export default App;
19
```

Then typed npm start in my console and then it opened a browser with localhost:3000 with the following output
